

AgriPreneur Support Network

Abstract

The AgriPreneur Support Network is a Python-based software application developed to support farmers and agricultural entrepreneurs. It provides access to essential resources such as government schemes, agricultural market prices, and expert guidance, helping users make informed decisions and improve productivity.

Objectives

- Provide information on government schemes and subsidies.
- Display updated agricultural market prices.
- Offer expert support for better farming practices.
- Promote agricultural entrepreneurship through technology.

System Overview

The system is developed using Python and is designed with a simple and user-friendly interface. It bridges the gap between traditional farming methods and modern digital solutions by offering centralized and reliable agricultural information.

Advantages

- Easy access to reliable information.
- Improved decision-making and productivity.
- User-friendly and scalable platform.

Conclusion

The AgriPreneur Support Network empowers farmers and agri-entrepreneurs by integrating digital technology into agriculture. The system supports sustainable growth and encourages the adoption of modern farming practices.
