

AgriPreneur Support Network

Student Name: Monisha R

Project Title: AgriPreneur Support Network

Technology Used: Java, GitHub

Abstract

The AgriPreneur Support Network is a software project designed to support farmers and agricultural entrepreneurs by providing a digital platform for registration, resource sharing, mentorship, and market access. This system helps AgriPreneurs connect with experts, government schemes, and fellow farmers.

Objectives

- To support agricultural entrepreneurs digitally.
- To provide easy access to resources and mentorship.
- To promote innovation in agriculture.

Conclusion

This project demonstrates how software technology can empower the agricultural sector by supporting AgriPreneurs and enhancing productivity.
